DANCING WIND

Liveaboard *Getaway*

Dancing Wind is a traditional Indonesian two-masted phinisi, hand-built from selected teak and ironwood and given a modern makeover in design and facilities – old-world style combined with modern comfort.

Built for diving adventure, she explores the legendary reefs of Raja Ampat and some of Indonesia's most remote and rarely dived regions, with an experienced crew who know these waters intimately.

Fitted out with modern navigation and communication equipment – GPS, echo sounder, VHF radio and satellite-based communication for phone calls – she combines traditional craftsmanship with the reassurance of modern systems.
